

李鹏飞

博士生导师，特别副研究员

北京理工大学，前沿交叉科学研究院

邮箱：lipengfei@bit.edu.cn

一、教育经历

2008.09–2013.07 中国科学院化学研究所 博士

二、科研与学术工作经历：

2016.09-至今 北京理工大学 特别副研究员

2013.09-2016.09 加拿大多伦多大学 博士后

三、主持或参加科研项目情况

主持国家自然科学基金青年基金项目一项

四、代表性研究成果：

[1] Yifa Chen, Shenghan Zhang, Fan Chen, Sijia Cao, Ya Cai, Siqing Li, Hongwei Ma, Xiaojie Ma, Pengfei Li*; Xianqiang Huang*; Bo Wang* Defect engineering of highly stable lanthanide metal-organic frameworks by particle modulation for coating catalysis, J. Mater. Chem. A, 2018, 6(2), 342~348

[2] Xianqiang Huang, Nianxin Rong, Pengfei Li*, Guodong Shen, Qiang Li, Nana

- Xin, Chuansheng Cui, Jichui Cui, Bingchuan Yang, Dacheng Li, Changqiu Zhao, Jianmin Dou*, Bo Wang* AIBN-Promoted Synthesis of Bibenzo[b][1,4]thiazines by the Condensation of 2,2'-Dithiodianiline with Methyl Aryl Ketones, *Org. Lett.*, 2018, 20, 3332~3336
- [3] Peng Fei Li, Tyler B. Schon, Dwight S. Seferos* Thiophene, Selenophene, and Tellurophene-based Three-Dimensional Organic Frameworks, *Angew. Chem. Int. Ed.*, 2015, 54, 9361~9366
- [4] Peng Fei Li, Chenxi Qian, Alan J. Lough, Geoffrey A. Ozin, Dwight S. Seferos* Permanently porous hydrogen-bonded frameworks of rod-like thiophenes, selenophenes, and tellurophenes capped with MIDA boronates, *Dalton Trans.*, 2016, 45, 9754~9757
- [5] Peng-Fei Li, Elisa I. Carrera, Dwight S. Seferos* Synthesis of Diphenylchalcogenophene Diboronic Acid Bis(pinacol) Esters and Halogen Photoelimination from Tellurium by Triplet-Triplet Annihilation, *ChemPlusChem*, 2016, 81(9), 917~921
- [6] Peng Fei Li, Chuan-Feng Chen* Triptycene-derived calix[6]resorcinarene-like hosts: synthesis, structure and self-assemblies in the solid state, *Chem. Commun.*, 2011, 47, 12170~12172
- [7] Peng Fei Li, Chuan-Feng Chen* Synthesis, Structures, and Solid State Self-Assemblies of Formyl and Acetyl Substituted Triptycenes and Their Derivatives, *J. Org. Chem.*, 2012, 77, 9250~9259
- [8] Peng Fei Li, Ying Han, Chuan-Feng Chen* Synthesis and structures of

tritycene-derived Troger's base molecular clips, *Chin. Chem. Lett.*, 2015,

26, 839~842
